College (Normal)

June 25

Kankakee Community Col
Prairie State College
Moraine Valley
Triton College
Wilbur Wright College

Charging up at a college near you!

Your local Illinois community college and its counterparts are part of a statewide initiative to create a network of electric vehicle charging stations providing the infrastructure necessary to travel statewide without range anxiety!

On June 23, after remarks by Lt. Gov. Shelia Simon, the EV tour will begin at John A. Logan College (Carterville, IL) and head toward the northernmost “charged” community college, College of Lake County (Grayslake, IL) stopping along the way to plug in and charge up. Lewis and Clark will welcome our friends from SWIC to campus on June 23rd at 4:15 pm. After a reception, to feature remarks from President Dr. Dale Chapman, the crew will drive to the Governor’s Mansion in Springfield for the next leg’s media event.

Events are free and open to the public.

Did you know Illinois has some of the best incentives for owning an electric vehicle in the nation, including:

- IEPA Alternative Fuel Rebate Program (10% of the vehicle MSRP, up to \$4,000)
- Federal Tax Credit of \$7,500.00 for electric vehicles
- Discounted Vehicle Registration fees for fully electric vehicles
- A robust EV Charging Station network, see <http://www.driveelectricillinois.org/>
